WAGGZ GROOMING TABLE/TUB

SAFETY & CARE GUIDE

IMPORTANT — READ BEFORE USE

Proper operation, routine inspection, and appropriate care are essential for the safe use and long-term performance of your WAGGZ grooming **table/tub**.

Read this guide completely before operating the table/tub. All employees, groomers, technicians, and other individuals who operate or work around the table/tub should be familiar with these safety instructions.

Failure to follow these instructions may result in **personal injury, pet injury, equipment damage, or property damage.**

1. IMPORTANT SAFETY RULES

NEVER operate the table/tub if it is damaged, unstable, or operating abnormally.

NEVER place hands, feet, tools, equipment, or any part of your body underneath or near moving portions of the table/tub while it is operating.

NEVER sit, stand, kneel, or ride on the tabletop or tub.

NEVER move, drag, pull, push, or lift the table/tub using the grooming arm or grooming arm post.

NEVER use the grooming arm as a handle, tie-down point, anchor, or lifting point.

NEVER transport the table/tub in a raised or partially raised position.

NEVER leave the foot pedal where it can be accidentally activated.

NEVER operate the table/tub while performing maintenance, adjustments, cleaning underneath the unit, or servicing electrical or mechanical components.

NEVER allow children or untrained individuals to operate the table/tub.

NEVER modify, disable, bypass, or remove safety-related components or electrical components.

NEVER continue operating the table/tub after an impact, tip-over, drop, structural damage, or other event that may have affected its condition until it has been properly inspected.

WHEN IN DOUBT: STOP USING THE TABLE/TUB AND CONTACT WAGGZ CUSTOMER SUPPORT.

2. BEFORE EVERY USE

Daily 5-Minute Safety Check

Before the first use of each day, and whenever the table/tub has been moved, transported, or subjected to an unusual event, perform a brief visual and functional inspection.

CHECK THE FRAME & TABLETOP/TUB

Confirm that:

- The table/tub is stable and positioned securely.

- The table/tub does not wobble excessively.
- The frame is not bent, cracked, or visibly damaged.
- There are no loose, missing, or visibly damaged hardware components.
- The tabletop or tub is securely attached.
- The tabletop or tub is properly aligned and does not move excessively.
- There are no sharp edges, exposed components, cracks, or other conditions that could injure a person or pet.
- For tubs, inspect the tub body, base, drain, hoses, faucet, sprayer, and other accessible components for visible damage or leaks.

DO NOT use the table/tub if structural damage and or instability is present.

3. CHECK THE GROOMING ARM

Before placing a pet on the table:

- Make sure the grooming arm is properly installed.
- Confirm that the grooming arm and mounting components are secure.
- Check adjustment knobs, clamps, sleeves, and connections.
- Make sure the arm does not move unexpectedly when properly secured.
- Make sure the restraint equipment is appropriate for the pet and properly attached.

DO NOT use a damaged or improperly secured grooming arm.

DO NOT use the grooming arm to move, pull, push, drag, lift, or carry the table.

DO NOT use the grooming arm or grooming arm post as a tie-down or anchoring point during transportation.

4. CHECK THE FOOT PEDAL

The foot pedal controls the movement of the table/tub and must be positioned where it cannot be accidentally activated.

Before use:

- Make sure the pedal is positioned safely and remains accessible to the operator.
- Keep boxes, tools, towels, cords, grooming equipment, stools, and other objects away from the pedal.
- Make sure the pedal and its cord are not damaged.
- Confirm that the UP and DOWN functions operate normally.

IMPORTANT

An accidental pedal activation can cause unexpected table/tub movement.

Never place an object on the pedal.

Never allow anyone to lean, kneel, sit, or work in a position where the pedal could be accidentally pressed.

Before reaching underneath the table/tub, cleaning underneath the unit, adjusting components, or performing service, disconnect power and ensure the unit cannot be accidentally activated.

5. CHECK TABLE/TUB MOVEMENT

Before placing a pet on the table/tub, briefly operate the unit through its normal lifting and lowering functions.

Watch and listen for anything unusual.

STOP IMMEDIATELY IF YOU NOTICE:

- Grinding
- Clicking
- Scraping
- Popping
- Unusual electrical sounds
- Abnormal vibration
- Jerking
- Sudden movement
- Uneven lifting
- Uneven lowering
- Excessive wobbling
- Delayed or inconsistent operation
- Unexpected stopping
- Any movement that differs from normal operation

Do not continue operating the table/tub to see if the problem corrects itself.

If the table/tub does not operate normally, **stop using it and contact WAGGZ Customer Support.**

6. CHECK THE POWER CORD & ELECTRICAL COMPONENTS

Before use, visually inspect the power cord, plug, and accessible electrical connections.

DO NOT use the table/tub if:

- The power cord is cut, frayed, crushed, or damaged.
- The plug is damaged.
- Electrical components appear damaged.
- There are exposed wires.
- You notice burning smells, smoke, sparking, or unusual electrical behavior.

ALWAYS:

- Keep the power cord away from water and liquids.
- Keep the cord away from moving components.
- Prevent the cord from being crushed, pinched, or driven over.
- Keep the cord away from walkways where it could create a trip hazard.
- Disconnect power before performing service or maintenance.

FOR GROOMING TUBS:

Water and electricity must be kept separate.

Keep electrical connections, control boxes, plugs, and other electrical components away from water.

DO NOT spray or pour water onto electrical components.

DO NOT operate electrical components with wet hands.

If water reaches an electrical component or electrical connection, **stop use, disconnect power when it is safe to do so, and contact WAGGZ Customer Support.**

7. PINCH & CRUSH HAZARD

WARNING — MOVING TABLE/TUB COMPONENTS CAN CREATE PINCH AND CRUSH POINTS.

The lifting mechanism, frame, tabletop/tub, and other moving components can create areas where fingers, hands, feet, equipment, or other objects may become trapped.

NEVER:

- Place your hands underneath the tabletop or tub while the unit is moving.
- Reach underneath the table/tub while operating the foot pedal.
- Place your feet underneath the table/tub.
- Allow a pet to remain underneath or near the moving structure.
- Place tools, equipment, boxes, cords, or other objects underneath the table/tub.
- Attempt to stop the table/tub by physically holding or blocking a moving component.
- Reach into the lifting mechanism while the unit is powered.

BEFORE LOWERING THE TABLE/TUB:

STOP — LOOK — CLEAR THE AREA — THEN LOWER.

Always visually confirm that the entire area underneath and around the moving portions of the table/tub is clear.

8. WATER & DRAIN SAFETY — GROOMING TUBS

For WAGGZ grooming tubs, always monitor water flow and drainage during use.

ALWAYS:

- Confirm that the drain is functioning properly before filling the tub.
- Monitor the water level while the tub is filling.
- Make sure the drain is unobstructed.
- Keep water away from electrical components.
- Inspect hoses and connections for visible leaks.

9. MOBILE GROOMERS: TRANSPORTING GROOMING TABLES

For mobile grooming operations, grooming tables must be properly lowered and secured before the vehicle is moved. Failure to follow these precautions may result in equipment damage, unintended table movement, or personal injury.

1. Lowest Position

Always lower the grooming table to its lowest position before transporting the vehicle. Never transport the table in a raised position.

2. Securing the Table

Properly secure the grooming table to prevent shifting, tipping, or excessive side-to-side movement during transportation. Ensure that all securing mechanisms are properly installed and engaged.

3. Foot Pedal Safety

Position and secure the foot pedal to prevent accidental activation. Ensure that the pedal cannot come into contact with surrounding objects, equipment, or interior components of the grooming vehicle during transportation.

4. Road Movement and Vibration

Account for vehicle acceleration, braking, turning, road vibration, and bumps when securing the grooming table. Inspect the table and its securing mechanisms before each trip.

5. Warranty Exclusion

Damage resulting from improper securing, inadequate restraint, or failure to follow the transportation instructions outlined above is not covered under Waggz's limited warranty, subject to applicable law and the terms of the warranty.

IMPORTANT SAFETY WARNING

Never operate or adjust the grooming table while the vehicle is moving. Before using the table after transportation, ensure that the vehicle is safely parked, the table is stable, and the foot pedal and lifting mechanism are functioning properly.
